## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 60-61 are rejected under 35 U.S.C. 102(b) as being anticipated by Bancroft et al. (U.S. Patent No. 6,661,380).

Regarding claim 60, Bancroft et al. teaches in figures 1A-1B an antenna [10], comprising: a dielectric substrate [18] in or on which a planar element [20] that is conductive, and has a feed position [30] is formed; and a ground pattern [42] that is juxtaposed with the dielectric substrate and is formed to have a tapered shape with respect to the feed position (See FIG. 1A), and wherein the planar element has a cut-out portion [46] formed at an edge portion being opposite to the ground pattern side of the planar element.

Regarding claim 61, Bancroft et al. teaches in figures 1A-1B a wireless communication card, comprising: a dielectric substrate [18] in or on which a planar element [20] that is conductive and has a feed position [30] is formed; and a board [16] on which the dielectric substrate is mounted, and in or on which a ground pattern [42] that is juxtaposed with the dielectric substrate is formed, and wherein the dielectric substrate is mounted at an end portion of the board, and the ground pattern is formed to have a tapered shape (See FIG. 1A) with respect to the feed position, and a region

extending toward at least either of a right side and a left side of the dielectric substrate, and the planar element has a cut-out portion [46] formed at an edge portion being opposite to the ground pattern side of the planar element.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 60-61 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 13 of copending Application No. 10/655,304. Although the conflicting claims are not identical, they are not patentably distinct from each other because the referenced copending application and the instant application are claiming common subject matter.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
